

# CORROSION<sup>X</sup> BARRIER SHIELD

REPELS CONCRETE, MORTAR, GROUT, GUNITE & PAINT

## INTRODUCING Corrosion<sup>X</sup> Barrier Shield

BARRIER SHIELD is a product designed to repel concrete, mortar, grout, gunite, paint, road and industrial grime from concrete trucks and other roadworking equipment. BARRIER SHIELD attaches electrostatically to both painted and unpainted surfaces. Dilutable with water, BARRIER SHIELD is economical to use, and one application lasts for an entire day.

- Save hours of cleanup time
- Helps protect vehicle finishes
- Quick, easy and economical application
- One application lasts for an entire day
- Nonhazardous

### DIRECTIONS

1. For best results, **BARRIER SHIELD** should be diluted 2:1 with water.
2. Apply to a dry surface.
3. The product may be sprayed or wiped on with a rag, mop, sponge or similar device. Smaller equipment may also be dipped.
4. **BARRIER SHIELD** can be removed (if needed) with any alkaline cleaner and a brush. Rinse concrete truck or roadworking equipment well after using any cleaner product.
5. **BARRIER SHIELD** works best when applied at the end of each work day; the product will continue working until the end of the following work day.

### SAFETY PRECAUTIONS

- **KEEP OUT OF REACH OF CHILDREN**
- If swallowed, seek aid from a physician.
- If sprayed into eyes, flush with water.
- Refer to MSDS for complete safety information prior to using this or any other chemical product.

part # 23001
