

CORROSION^X KNOCKOUT

THE MOST POWERFUL CONCRETE REMOVER

100

CORROSION TECHNOLOGIES **KNOCKOUT 100**

Knockout 100 Concrete Remover is the most powerful technology developed for the removal of concrete. It is safe on materials such as iron, steel, plastic, rubber and vinyl. Also effective for the removal of 'bleeding rust' from vehicles and painted equipment.

- Fast-acting
- Concentrated
- Biodegradable
- Safe of vehicle paint
- Safe in wiring

DIRECTIONS

1. **WIPE, BRUSH OR SPRAY:** May be applied full strength or diluted up to 3:1 with water depending on the thickness of the concrete or rust. Recommend applying with an acid resistant brush or spray system.

AGITATE with a brush for quicker removal.

2. **DIPPING:** Dilute product 3:1 with water. Remove any grease or oil from the surface of the item to be dipped, then submerge item in a poly, plastic or rubber dip tank. Steel tanks may be used if they are coated with epoxy paint or lined with vinyl.

3. **NEUTRALIZE:** After wiping, brushing, spraying or dipping an item in Knockout 100, once the concrete and rust have been removed, it is important to create a neutral pH to prevent any metal on the item from rusting. For this purpose, we recommend Corrosion Technologies' **Xtreme Clean**.

SAFETY PRECAUTIONS

- **KEEP OUT OF REACH OF CHILDREN**
- Do not ingest.
- If contact with eyes occurs, rinse for 5 minutes and seek medical attention.
- Wash well with soap and water after use.
- Refer to MSDS for complete safety information prior to using this or any other chemical product.

**ONLY USE
KNOCKOUT 100
OUTDOORS**
