

CORROSION^X SILI SPRAY

REPELS CONCRETE, MORTAR, GROUT, GUNITE & PAINT

CORROSION TECHNOLOGIES' SILI SPRAY

SILI SPRAY is a product designed to repel concrete, mortar, grout, gunite, paint, road and industrial grime from concrete trucks and other roadworking equipment. SILI SPRAY attaches electrostatically to both painted and unpainted surfaces. Cost effective and ready-to-use, SILI SPRAY minimizes wear on equipment and saves valuable man-hours by reducing cleanup time. One application lasts for an entire work day.

- Save hours of cleanup time
- Helps protect vehicle finishes
- Quick, easy and economical application
- One application lasts for an entire day
- Nonhazardous

DIRECTIONS

1. SILI SPRAY is read-to-use and may be applied to any dry, non-porous surface.
2. The product may be sprayed or wiped on with a rag, mop, sponge or similar device. Smaller equipment may also be dipped.
4. SILI SPRAY can be removed (if needed) with any alkaline cleaner and a brush. Rinse concrete truck or roadworking equipment well after using any cleaner product.
5. SILI SPRAY works best when applied at the end of each work day; the product will continue working until the end of the following work day.

SAFETY PRECAUTIONS

- KEEP OUT OF REACH OF CHILDREN
- If swallowed, seek aid from a physician.
- If sprayed into eyes, flush with water.
- Refer to MSDS for complete safety information Prior to using this or any other chemical product.
